EDUCATION

Carnegie Mellon University (CMU), School of Computer Science Pittsburgh, PA
Master of Computational Data Science (MCDS) | GPA: 4.11/4.33 December 2020
Relevant Coursework: Machine Learning, Deep Learning, Neural Networks for NLP, Machine Learning for Large Datasets, Multimodal Machine Learning, Cloud Computing, Computer Systems, Interactive Data Science

National Institute of Technology Karnataka, Surathkal (NITK) Surathkal, India
Bachelor of Technology Information Technology | GPA: 9.54/10, Class Rank: 5/103 May 2019

EXPERIENCE

Amazon Palo Alto, CA
Applied Scientist II, Amazon Search Feb 2021 - Present

- Working on building universal state-of-the-art semantic representations of Amazon-specific entities.
- Trained large billion-parameter language models and used cross-architecture knowledge distillation to distill and deploy models to boost Click-through rate (CTR) prediction in e-commerce advertisement.
- Developed generative encoder-decoder models to improve the spell correction system at Amazon.

Amazon Seattle, WA
Applied Scientist Intern, Amazon Search May 2020 - Aug 2020

- Developed deep learning models to link context-of-use entities with products to improve search experience.
- Proposed BERT-based and co-teaching approaches to improve precision and coverage of links compared to lexical matching while also overcoming noisy labels in training data.

Indian Institute of Technology, Hyderabad (IITH) Hyderabad, India
Research Intern at Visual Learning and Intelligence (VIGIL) lab August 2018 - December 2018

- Developed a novel Multi-Space model for Zero-Shot Object Detection (ZSD).
- Leveraged both semantic and visual spaces and introduced a cross-modal consistency loss to alleviate hubness.
- Outperformed the state-of-the-art in ZSD on Pascal VOC by 14% in mean average precision (mAP).

Microsoft Hyderabad, India
Software Engineering Intern, Azure Networking May 2018 - July 2018

- Developed a plug and play service for effective management, monitoring and usage of Test clusters.
- Facilitated easy locking and unlocking of clusters and devised health checks for seamless maintenance of clusters.

ACADEMIC PROJECTS

Graph Relation Transformer for Text Visual Question Answering (Text-VQA) Fall 2020

- Proposed a multimodal Graph Relation Transformer which leverages transformer layers for graph attention computation with rich edge and node information for the task of Text-VQA.

End-to-End 2D to 3D Video Conversion [Github](#) | Spring 2020

- Extended Deep-3D model using monocular depth estimation and segmentation masks from Mask-RCNN.

Fact Extraction and Verification (FEVER shared task) [Github](#) | Spring 2020

- Implemented a BERT-based model and strengthened claim verification module using Multi-Task Deep Neural Networks (MT-DNN) and Stochastic Answer Networks (SAN) in addition to multi-hop evidence reasoning.

SKILLS

Programming Languages:	Python, C++, C, Java, C#, MySQL
Deep Learning:	PyTorch, TensorFlow, Deepspeed
Cloud Platforms and Tools:	AWS, Azure, Google Cloud Platform, Hadoop MapReduce, Spark
